De Concreetste Medepedagoog

Age Group	Male	Female
0-14	10	10
15-24	80	70
25-34	60	50
35-44	40	30
45-54	20	10
55-64	10	5
65-74	5	2
75-84	2	1
85+	1	0

Figure 1 is a line graph titled "Percentage of respondents who believe that the U.S. should take action to reduce global warming, by age group." The x-axis represents age groups: 18-29, 30-49, 50-69, and 70+. The y-axis represents the percentage of respondents, ranging from 0 to 100 in increments of 10. There are two data series: "Should take action" (represented by a solid line with square markers) and "Should not take action" (represented by a dashed line with circle markers). The "Should take action" series starts at approximately 65% for the 18-29 group, rises to about 75% for 30-49, 80% for 50-69, and reaches about 85% for the 70+ group. The "Should not take action" series starts at approximately 35% for the 18-29 group, falls to about 25% for 30-49, 20% for 50-69, and reaches about 15% for the 70+ group.

Age Group	Should take action (%)	Should not take action (%)
18-29	65	35
30-49	75	25
50-69	80	20
70+	85	15
