Fig. 2. Comparison of experimental and calculated values of the critical temperature T_c of the superconductors $\text{La}_{1-x}\text{Ce}_x\text{CuO}_7$ and $\text{La}_{1-x}\text{Ce}_x\text{CuO}_{7-y}$. The solid line is the calculated values of T_c for $\text{La}_{1-x}\text{Ce}_x\text{CuO}_7$ and the dashed line is the calculated values of T_c for $\text{La}_{1-x}\text{Ce}_x\text{CuO}_{7-y}$.	Table 1. Comparison of experimental and calculated values of the critical temperature T_c of the superconductors $\text{La}_{1-x}\text{Ce}_x\text{CuO}_7$ and $\text{La}_{1-x}\text{Ce}_x\text{CuO}_{7-y}$.

Figures grow steadily in Illinois

Illinois has the largest number of people with AIDS in the United States, according to a new report from the Centers for Disease Control and Prevention (CDC). The report, published in the *Morbidity and Mortality Weekly Report*, shows that the number of people with AIDS in Illinois has increased steadily since 1981, reaching over 1,000 by 1989. The CDC report also shows that the number of people with AIDS in Illinois is higher than in any other state in the United States.
