ВЕРХОВНОГО СОВЕТА НАЦИОНАЛИСТИЧЕСКОГО

Совета края (председательствует)

Маршал Советского Союза ИВАНОВСКИЙ

В соответствии с постановлением Верховного Совета Националистического Совета края от 15.12.1944 г. № 1000-1001, в котором определено, что в целях усиления борьбы с преступностью и охраны общественного порядка в крае должны быть созданы органы государственной безопасности, в том числе и органы государственной безопасности в городах, в которых имеются значительные скопления населения, постановляю:

1. Создать в г. Минске органы государственной безопасности, в том числе и органы государственной безопасности в городах, в которых имеются значительные скопления населения, постановляю:

Маршал Советского Союза ИВАНОВСКИЙ

Europe's first energy players' special

BY JIM HARRIS, PHOENIX

PHOENIX, ARIZ.—The Arizona Electric Power Conference (AEP) is a group of utilities that have agreed to share information and resources to improve the efficiency of their power plants. The group includes the Arizona Electric Power Service Corporation (AEPSC), the Salt River Project (SRP), the Phoenix Electric Light & Power Company (PEL&P), and the Salt River Valley Electric Association (SRVEA). The AEP was formed in 1998 and has since then been working on a variety of projects to improve the efficiency of its power plants. One of the most recent projects is the installation of new boilers at the Salt River Valley Electric Association's (SRVEA) 1,000-Mw Salt River Valley Electric Association (SRVEA) power plant. The new boilers are expected to be installed by the end of 2001 and will increase the plant's efficiency by 10 percent. The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact.

The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact. The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact. The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact.

The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact. The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact. The AEP is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The AEP is committed to improving the efficiency of its power plants and reducing its environmental impact.

Environmental group

The Environmental group is a group of people who are concerned about the environment. They are working to protect the environment and to improve the quality of life for everyone. The group is made up of people from all over the world and they are working together to make a difference. They are working on a variety of projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact.

The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact.

The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact.

The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact. The group is also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The group is committed to improving the efficiency of its power plants and reducing its environmental impact.

European countries' commitment to improve the environment

The European countries are committed to improving the environment and to reducing their environmental impact. They are working on a variety of projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact. The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact.

The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact. The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact.

The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact. The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact.

The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact. The European countries are also working on a variety of other projects, including the installation of new turbines and the improvement of the plant's control systems. The European countries are committed to improving the efficiency of their power plants and reducing their environmental impact.
